

Partner with our trusted team and expect results. As a 3rd party National Installation Team, we work with all manufacturers (Genie Series by Natus (Formerly Otometrics), ETS Lindgren (Acoustic Systems), IAC, Eckel and more) to ensure your sound room meets the needs of your practice and is installed to industry specifications. We focus on delivering exceptional and expert service.

Expect our professional and courteous team to take the reins of your new room installation with an unparalleled attention to detail that sets us apart from the rest. Sit back, relax and let us do the heavy lifting while guaranteeing an stress-free install day. Our approach focuses on three critical concepts.

Freight. We organize and co-ordinate with your vendor and freight carrier to ensure safe and proper receipt of your freight. Having a good plan for receiving freight on the morning of your install is critical for setting your project on the right foot. In many cases, we will organize a pick up of your freight directly at the terminal rather than waiting on a scheduled delivery. Our team is forklift certified in the event any special equipment is required to off-load larger freight and skilled at executing complicated, large deliveries.

Product Knowledge. Understanding your new sound room, its construction method and current trends in the industry are all essential for a successful installation. Our core philosophy centers around this very concept. We review and analyze your project prior to arrival so we understand on-site logistics, product details and any other necessary requirements in order to install your product to specification and within the tolerances required. As an independent installation team, we pride ourselves on our ability to work across all brands to make sure that the focus is on you,

the end user and the success of your project.

Best of class planning & procedures. We believe a successful project starts with a keen eye on detail and a strong procedural protocol. Our combined experiences in the field have aided us in developing the strongest procedures & policies in the industry. From Day 1 we start your project by collecting information from the host site, the product and the requirements to get the job done right. We create a robust project plan for every project (regardless of the scope) which ensures flawless detail accuracy. More importantly every one of our installers follows our in-depth & unique Journeyman program that allows the team on site lives up to our and more importantly YOUR high expectations!

Reach out to us to discuss or to schedule your project today!
